

## BIOTRACE PHYTO B

**\$57.90 inc GST**

### PRODUCT SUMMARY

BioTrace Phyto B is a plant-based B vitamin complex made from sprouted, powdered Buckwheat (*Fagopyrum esculentum*) seeds.

### MORE INFORMATION

Buckwheat is a member of the rhubarb family (gluten free) and is well known for its high nutrient content. The sprouting of buckwheat seeds greatly enhances their nutrient profile as the sprouting process activates and 'enlivens' the inherent vitamins, minerals and enzymes.

B vitamins are some of the first vitamins to deplete under stress and are therefore helpful to support energy, mood balance, adrenal gland function and liver function.

The buckwheat seeds in Phyto B are germinated using a proprietary process known as Cultavit, resulting in a fortified seed with higher amounts of B complex vitamins.

BioTrace Phyto B is manufactured in a GMP (Good Manufacturing Practice) certified plant and is an excipient free product. A high quality vegetable capsule ensures greater protection of encapsulated nutrients.

- Plant-based B Complex made from fortified, sprouted Buckwheat seeds

- Synergistic formula for optimal support
- May support energy, mood balance, adrenal gland function and liver function

## 2 REVIEWS FOR BIOTRACE PHYTO B

**Robyn Gerchow** - 2023-12-17 10:16:07

**5** out of 5

Was recommended to me by a naturopath as an exceptional form of B Complex vitamins. Have been taking for a number of years. Highly recommend.
