

PRL MICROBIOME SALT

\$66.49 inc GST

PRODUCT SUMMARY

Himalayan and Hawaiian Salt Blend with Probiotic Support for Gut, Immune, and Digestive Health.

MORE INFORMATION

Microbiome Salt is a functional salt blend formulated to support gut and immune health through daily use. * It combines two unrefined, mineral-rich salts (Himalayan Pink Salt and Red Alaea Hawaiian Sea Salt) with BS50®, a clinically studied strain of *Bacillus subtilis*. This spore-forming probiotic is known for its ability to survive heat, gastric acidity, and long-term storage without refrigeration.

Unlike conventional probiotics, BS50® remains viable during cooking and shelf life, making it easy to incorporate into everyday meals. Once in the gastrointestinal tract, it supports microbiome balance through multiple mechanisms: adhering to the gut lining, outcompeting unwanted microbes, producing digestive enzymes, and fermenting dietary fibers into short-chain fatty acids. * It also plays a role in immune modulation by supporting the gut-associated lymphoid tissue (GALT) and promoting secretory IgA production. *

The salt base provides naturally occurring trace minerals, including magnesium, potassium, and

iron, contributing to electrolyte balance, hydration, and neuromuscular function. * This product is free from synthetic additives, anti-clumping agents, and heavy metals.

Microbiome Salt is ideal for individuals seeking a practical, food-based approach to microbiome and mineral support, especially those recovering from GI disruption, following low-carb or ketogenic diets, or reducing their intake of processed salts. It offers a clean, consistent way to support foundational health through a simple, everyday ingredient.
