

BIOTRACE BIO IODINE PLUS

\$42.30 inc GST

PRODUCT SUMMARY

Bio Iodine Plus contains a blend of natural kelp and parsley providing 78mcg of elemental, bio-available iodine per capsule.

MORE INFORMATION

It is important to maintain good iodine levels for many essential bodily processes, including normal growth and development.

Iodine is necessary for the normal function of the thyroid gland. The thyroid gland produces hormones that regulate body metabolism - the biochemical process of converting oxygen and the calories from food and drinks into energy. Body metabolism affects hormone and temperature regulation, and the ability to gain or lose weight.

Kelp is an antioxidant herb which is naturally rich in elemental iodine. Iodine-rich herbs such as kelp are shown in studies to support iodine deficiency without causing the oxidative stress associated with excessive intake of potassium iodate / iodide.

Parsley works synergistically with kelp in helping to protect the thyroid gland from oxidative stress. Parsley is scientifically validated as an antioxidant herb for supporting liver, brain and digestive health. It supports healthy glutathione and SOD (superoxide dismutase) production in

the liver, both essential for detoxification.

Bio Iodine Plus is manufactured in a GMP (Good Manufacturing Practice) certified plant and is an excipient free product. A high quality vegetable capsule ensures greater protection of encapsulated nutrients.

- Synergistic blend of antioxidants Kelp and Parsley
- May support thyroid health and normal metabolism
 - Safely supports optimal iodine levels
- May support the liver, brain and digestive system
 - Vegan, Gluten-free, and Excipient-free
