

BIOTRACE CURCUMIN BIOPERINE

\$74.50 inc GST

PRODUCT SUMMARY

Curcumin is the active ingredient in turmeric responsible for its potent antioxidant properties, as demonstrated in several scientific studies.

MORE INFORMATION

BioTrace Curcumin BioPerine® contains high dose curcumin with piperine to aid absorption. BioTrace's pure herbal extracts in vegetable capsules ensure no nasty excipients (such as tableting agents) are required.

Curcumin may support joint, brain, heart, circulation and digestive function by helping to fight free radicals.

Studies show that piperine may improve the bioavailability of curcumin thereby promoting the absorption of curcumin throughout the body. Curcumin BioPerine® with piperine has more active curcuminoids than whole turmeric root or curcumin alone.

BioTrace Curcumin BioPerine® supports the muscular system, bones and joints, and people who typically have cold hands and feet.

BioTrace Curcumin BioPerine® also supports gallbladder and liver health, good digestion, and healthy blood lipid levels.

Clinical studies show that curcumin may also support normal brain function and positive mood.

BioTrace Curcumin BioPerine® is manufactured in a GMP (Good Manufacturing Practice) certified plant. A high quality vegetable capsule ensures greater protection of encapsulated nutrients.

- May support brain function and positive mood
- May support heart function and good circulation
 - May support muscle and skeletal function
- May support liver, gallbladder and digestive function
