

BIOTRACE ELEMENTAL MULTI TRACE

\$34.40 inc GST

PRODUCT SUMMARY

Mineral deficient soil can make it hard to get the recommended daily intake of minerals from our food. Elemental Multi Trace with Copper offers flexible dosing and bio-available multi-minerals.

Note: Use Multi Trace without Copper unless there is a known copper deficiency.

MORE INFORMATION

Elemental Multi Trace with Copper contains Concentrated Mineral Drops (CMD), naturally sourced from the Dead Sea in Jordan, providing up to 72 trace elements that may be missing from the diet.

BioTrace Elemental Multi Trace (with copper) provides 100% of the Recommended Daily Allowance (RDA) of zinc, selenium, copper, manganese, chromium and molybdenum, plus boron and magnesium in soluble, ionic form - a form thought to be more readily absorbed by the body.

Copper is an essential element that may support hormone balance and iron absorption in copper deficient individuals.

Use this product only under the guidance of a qualified health practitioner.

Our BioTrace Liquid Elemental range provides affordable, flexible dosage options of many essential minerals.

- Bio-available, liquid mineral concentrate with up to 72 naturally occurring trace elements
- Providing 100% of the recommended daily allowance (RDA) for many essential minerals
 - May support iron absorption in copper deficient individuals
 - Economical and flexible dosage form

1 REVIEW FOR BIOTRACE ELEMENTAL MULTI TRACE

Sarah Campbell-MacKenzie - 2024-10-22 11:02:39

5 out of 5

Client noticed straight away that this was having a positive effect. Such a great way to take as well as increasing fluid intake at the same time.
