

BIOTRACE HYSSOP IMMUNE

\$58.00 inc GST

PRODUCT SUMMARY

BioTrace Hyssop Immune is a herbal complex designed to support the immune system. It contains four herbs for a synergistic effect – Hyssop, Oregano, Cat's Claw and Anise.

MORE INFORMATION

Scientific research indicates that these herbs may support the immune system during times of stress.

Hyssop may be supportive of the respiratory system, especially during allergy season. It possesses antioxidant and immune defence properties.

Oregano is rich in antioxidant phenols, including thymol and calvacrol, which may support immune defences, the liver and digestive system.

Cat's Claw research shows that it may support the immune system and gastrointestinal health.

Anise is an aromatic herb historically used to support the immune system and as a digestive aid. Studies support the traditional uses of this herb.

Collectively these four antioxidant-rich herbs may support the body's immune defences

throughout the respiratory system, digestive system, and intestines.

- May support the immune system
- May support respiratory health
- May support the digestive system
- Provides antioxidant support
