

PRL FERMENTED MUSHROOM BLEND

\$91.00 inc GST

PRODUCT SUMMARY

Premier Fermented Mushroom Blend features a six different types of organically grown, premier quality fermented mushrooms in their full-spectrum state. This blend is deal for maximum bioavailability, digestion and absorption.

MORE INFORMATION

Current research shows that the human immune system can be given excellent support by using a mixture of polysaccharides from several proven immunomodulating mushrooms. The pre-digested, fermented organic mushrooms in this product offer a vast array of naturally occurring vitamins, minerals and immunomodulating polysaccharides.

Scientific research shows that the mushroom's immune-supporting polysaccharides are located within the cell walls of an indigestible fiber called chitin. Since chitin is very difficult for the body to digest, it must be either cooked, hot water extracted or fermented in order to release its nutritional payload. The mushrooms in Premier Fermented Mushroom Blend have been micro-cultured through a unique probiotic fermentation process. This aids in digestion and allows its beneficial immune support compounds, such as polysaccharides, to be easily digested and immediately absorbed at their peak activity and in their most bioavailable form.
